Accordingly, no prior period adjustment has been required. The directors of the Company anticipate that the application of these standards, amendments or interpretations will have no material impact on the results and the financial position of the Group.

BUSINESS REVIEW

For the six months ended 30th September, 2009, the world economic conditions had worsened which led to an adverse impact to the Group's business. As a result, the Group recorded a turnover of approximately HK\$92,480,000 representing a decrease of 34.6% as compared to same period last year, and gross profit was approximately HK\$7,617,000 representing a decrease of 33.7% as compared to the same period last year. Moreover, an impairment loss on trade and other receivables of approximately HK\$3,488,000 had also been made and included in the administrative expenses after prudent consideration by the Board. However, the Group recorded a favourable valuation adjustment of approximately HK\$19,335,000 on the fair value changes on the financial instruments because of the recovery of the worldwide financial market. Consequently, the Group recorded a net profit of approximately HK\$9,829,000 for the period.

During the period, manufacturing and sales of the knitted fabric and dyed yarns, and provision of dyeing services are the principal operation of the Group. Production costs have increased because of rise in price of dyed material, coal and electricity, and salary and wages in China. The impact of production cost increase was reduced by the stringent cost control measures which had delivered a positive impact to the Group. As a result, the Group's gross margin was remained at the almost same level of approximately 8.2%.

During the period, the Group managed to control other production costs and overhead expenses reasonably well. The Group has also continued its prudent and conservative credit policy towards customers, and has monitored closely its inventory level as well as production requirements. These measures have enabled the Group to maintain a healthy cash level.

During the period under review, the Group invested approximately HK\$489,000 in property, plant and equipment to upgrade its factory and production facilities so as to increase its productivity and to enhance its production quality. Together with the capital investments in previous years, the Group has managed to achieve production at better economies of scale.

PROSPECTS

Looking forward, the high production costs resulting from the price increase in dyed material, salary and wages in China is likely to continue to affect the Group's performance. The Board believes that the business environment in the second half of the year is expected to be highly competitive and more challenging. The Group will continue to take appropriate cost control measures, rationalizing its operations, applying prudent credit policy for its customers and improving product quality in order to achieve improved return for its shareholders.

On 17th November, 2009, the Group has entered into two acquisition agreements pursuant to which the Group conditionally agreed to purchase a coal mining company and a shipping company from independent parties. The acquisitions would enable the Group to broaden its source of income by diversifying its business to include mining of mineral resources and vessel-chartering business, and to acquire expertise in operating the coal mining business and vessel business. The Company therefore believes that the acquisitions would offer the Group a good opportunity to diversify into businesses with good prospect, to enhance the Group's income stream and the overall profitability, and to maintain the Group's growth momentum. The details of these acquisitions were disclosed on the announcement dated 27th November, 2009, and the circular containing further information regarding these acquisitions as required by listing rules will be dispatched to the shareholders of the Company on or before 25th February 2010.

The Group's bank indebtedness to equity ratio is only 0.008. Current ratio is 8.7. The Board believes that the Group's sound and healthy financial position will enable it to finance its operation and explore other business development opportunities.

As at 30th September, 2009, the Group has financial assets of HK\$56,973,000 and high graded held-to-maturity investments of approximately HK\$7,800,000.

The Groups' assets, liabilities and business transactions are principally denominated in Hong Kong dollars, Chinese Renminbi and US dollars and therefore the Group is exposed to foreign exchange risks from U.S dollar and Chinese Renminbi.
